STOP GLOBE VALVE TYPE 674

CHARACTERISTIC:

Diameter	-	15 -100 mm;
Pressure	-	320 bar;
Temperature	-	up to 670°C;
Medium	-	water, steam and other non-toxic, non aggressive liquid and gas media.

VERSIONS:

type / ends / body material / disc and disc ring / drive type

		Example: 07	/	/ /									
Example: 674 / K / U / L /													
Ends	Sign	Body material	Sign	Disc and disc ring	Sign	Drive type	Sign						
Standard-butt weld ends		(P250GH) C 22.8		Standard		Hand wheel							
Socket weld	SW	16Mo3	U	Stellit ring	L	AUMA drive	NA						
Flange by DIN or ANSI, or Threaded	K	13CrMo4-5	Α			NWA drive	NW						
		11CrMo9-10	В			MODACT drive	NM						
		14MoV6-3	С			Pneumatic drive	NP						
		X10CrMoVNb9-10	E			Pheumatic unve	NP						

APPLICATION:

Stop globe valve with throttle plug is designed to open and stop the flow. The valve is supposed to be used as a regulating device.

MOUNTING AND OPERATING:

The valve can only be mounted and operated by skilled, properly trained and qualified personnel. Incorrect assembly or operation of the valve may have substantial impact on the entire system such as fluid leakage, reduction in system's function etc.

Before a valve is installed the pipeline must be clean from any mechanical impurities. The compatibility of critical parameters of the flow must be checked with the parameters of the valve. Stop globe valve can be mounted to a pipe-line in any position. The direction of flow should only comply with the arrow marked on the body. The valve should be operated strictly with its assign. In order to provide valve's reliability the following suggestions must be observed:

- medium flowing through the valve is supposed to be clean out of any mechanical impurities;
- the valve must be protected from any mechanical damages during its work;
- nominal parameters marked on the valve must be observed.
